

JACK KELM

Jackkelm13@gmail.com

(330)241-7532

Northfield OH

SKILLS

Robotics: ABB, Fanuc, Kuka, Universal Robots

Computer Vision: Keyence, Cognex, Teledyne
FMEA, Robot Safety, Risk Assessments (RIA
R15.06)

3D Scanning: Artec Spider, Artec Leo, Creaform

CAD: SolidWorks, CATIA, Inventor, Fusion 360 Generative Design,
Ansys, SpaceClaim

3D printers: J750, Fortus (250,370,450mc), Carbon M2, EOS P396

Design For Additive: Powder-Bed-Fusion (Metal and plastics),
FDM, Resin

EXPERIENCE

Parker Hannifin, Macedonia, OH – *Automation Engineer* (July 2017 – present)

- Business Case Development (2023 - present)
 - Identified \$55m worth of yearly savings across 1/5th of Parker's N.A. manufacturing plants.
- Project Management
 - Provided technical expertise for 800+ robot cell projects at remote Parker sites. This includes all aspects of robot cell design: structure, electrical, sensors, programming, safety, and risk assessment per RIA R15.08.
 - Designed and implemented a robot cell which saved 12 FTEs conducting ventilator valve testing, increasing throughput during a time of surging demand (12x usual demand) for ventilator valves in response to the global pandemic.
 - Identification and remote management of several automation projects. One example is a project to automate the testing of fluid valves. During this project, I visited the site to determine the best automation opportunities and directed the on-site engineer through the steps required to implement the project, ultimately leading to \$2.8M/year in savings by improving testing throughput and reducing labor costs.

Hyson Metal Forming Solutions, Brecksville, OH – *Engineering Co-op* (Summers 2013-14-15)

Shop Operator, HSE/Quality, Engineering Co-op

EDUCATION

Embry-Riddle Aeronautical University, Daytona Beach FL— *Mechanical Engineering (Robotics Concentration)* May 2017

CERTIFICATIONS/AWARDS

Certified ABB Robot Studio 1 Trainer

First Place Winner –2016 Tech Entrepreneurship Expo, Embry-Riddle Aeronautical University

Private Pilot
